

PEERZADA SYED SHAMAAN HUSSAINI

Full Stack Developer | Cloud & Serverless (AWS) | AI/LLM Integration

Hyderabad, Telangana, India | +91 9100337152 | syedshamaan14@gmail.com

[LinkedIn: linkedin.com/in/syed-shamaan-hussaini](https://www.linkedin.com/in/syed-shamaan-hussaini) | [GitHub: github.com/SyedShamaan2000](https://github.com/SyedShamaan2000) | [Portfolio](#)

SUMMARY

Full Stack Developer with expertise in the MERN stack, API design, and secure, scalable web applications. Experienced in Stripe payment integration, PostgreSQL database management, Docker containerization, serverless deployment on AWS (Lambda, API Gateway), and web security best practices. Skilled in building Retrieval-Augmented Generation (RAG) pipelines and integrating LLM APIs (OpenAI, Gemini) for intelligent features. Adept at collaborating in agile teams to deliver reliable, production-ready software.

SKILLS

Languages: JavaScript, Python, C, C++

Frameworks & Libraries: React, Redux, Tailwind CSS, Material UI, FastAPI, Streamlit

Backend & Serverless: Node.js, Express.js, AWS Lambda, API Gateway, Serverless Framework, RESTful API Development, Server-Side Logic, Data Security

Databases & Vector Stores: MongoDB, PostgreSQL, Firebase, Neon (Serverless Postgres), Vector Databases

Cloud & DevOps: AWS, Docker, GitHub Actions, CI/CD Pipelines, Git/GitHub, Netlify

AI/LLM & RAG: OpenAI API, Gemini API, Retrieval-Augmented Generation (RAG), Document Ingestion Pipelines, Prompt Engineering

Soft Skills: Communication, Teamwork, Collaboration, Problem Solving, Critical Thinking, Time & Project Management, Adaptability, Continuous Learning

WORK HISTORY

Full Stack Developer December 2024 – Present

Sakesh InfoTech Pvt Ltd, Hyderabad, India / Texas, USA

Product: [lotuspetal.ai](#) — AI-powered proposal & capture management software for GovCon and commercial contracting teams

- Built and optimized React UI components for 5+ features, improving performance and usability and reducing unnecessary re-renders by ~25%.
- Created scalable FastAPI backend services with structured validation and error handling, delivering 10+ APIs supporting real-time client consumption.
- Managed application databases across development and production environments, handling thousands of records while ensuring data integrity, backups, and optimized queries.
- Integrated LLM workflows to summarize multi-page DOCX documents and dynamically generate PPTX presentations.
- Configured and integrated Stripe price IDs into frontend and backend services, enabling 1 new pricing tier within the existing payment system.
- Used Dockerized workflows to support deployments and maintenance.

Remote Software Developer Intern January 2024 – February 2024

CodeClause, Pune, India

- Engineered a language translation tool using the OpenAI API, enhancing user satisfaction and translation accuracy.

PROJECTS

Serverless REST API on AWS (Node.js, Express, Serverless Framework) | github.com/SyedShamaan2000/serverless-nodejs-api-yt

- Designed and deployed a serverless Express.js REST API on AWS Lambda using the Serverless Framework and API Gateway, eliminating server management overhead.
- Connected the API to a Neon serverless PostgreSQL database for scalable, low-maintenance data persistence.
- Configured IAM roles and deployment permissions, and automated build/deploy workflows with GitHub Actions for continuous integration.
- Enabled local emulation and rapid iteration using the Serverless Offline plugin before cloud deployment.

Simple RAG — Retrieval-Augmented Generation Pipeline (Python, FastAPI) | github.com/SyedShamaan2000/simple-rag

- Built a Retrieval-Augmented Generation (RAG) system with a FastAPI backend, Pydantic schema validation, and a Dockerized PostgreSQL vector store for semantic search.
- Developed a document ingestion pipeline to chunk, embed, and index source documents for accurate context retrieval.
- Implemented a query interface that retrieves relevant context and augments LLM prompts to produce grounded, accurate responses.

Job Tracker — Job Application Pipeline Tracker (MERN) | github.com/SyedShamaan2000/job-tracker

- Built a full-stack job-hunt tracking web app to manage applications through the hiring pipeline, from Saved to Offer, with status, priority, and custom labels.
- Implemented networking-contact records linked to companies and persistent filtering/search across all saved data.
- Set up CI/CD with GitHub Actions and deployed the app live on Vercel.

BudgetBuddy — Finance Tracking and Budgeting Web App (MERN, Gemini API, Team Project)

- Collaborated in a 3-person team to build a budgeting and expense-tracking tool using the MERN stack with Gemini API integration for personalized financial advice.
- Implemented interactive spending visualizations with Chart.js and animated UI backgrounds using React Particles.

AI-ChatLingo — Language Learning Web App (MERN, Gemini API) | github.com/SyedShamaan2000/AI-ChatLingo

- Architected user authentication and AI-powered chatbot interactions, utilizing the MERN stack and Gemini API.
- Delivered a responsive UI and optimized performance across devices.

TaskTrackr — Task Manager Web App (MERN) | github.com/SyedShamaan2000/taskapp

- Built a task management tool featuring user authentication, task editing, and deletion, prioritizing security and usability.

EDUCATION

Bachelor of Engineering, Computer Science 2020 – 2024

Deccan College of Engineering and Technology (Osmania University), Hyderabad, India | CGPA: 7.43

Intermediate (MPC) 2018 – 2020

MS Junior College, Mehdiapatnam, Hyderabad, India | CGPA: 9.53

Secondary School (SSC) 2018

MS Creative School, Mallepally, Hyderabad, India | CGPA: 9.2

ACHIEVEMENTS

- Secured 1st Winner Place at a Hackathon conducted by MetLife Company.
